DNR OR DOC CONSTRUCTION SITE STORMWATER PERMIT APPROVAL NUMBER

CONDITIONS OF APPROVAL (CITY USE ONLY)

CITY ENGINEER OR DESIGNEE	DATE
---------------------------	------

NOTES: 1) It is necessary to enclose DNR or DOC construction site stormwater permit submittal and stormwater permit. They shall meet performance standards of ordinance and provide erosion and sediment control plan if not provided in DNR or DOC submittal.
2) This permit is only for land disturbing construction activity and an excavating permit is required if excavating in public right-of-way. A storm sewer connection permit is required to connect to the City's storm sewer system.

Erosion Control Permit Requirements, 32.08(5)

1. Notify City Engineer within 48 hours of commencing any land disturbing construction activity.
2. Notify City Engineer within 14 days after BMP installations are complete.
3. Obtain written permission from the City Engineer before any modifications are made to the plan.
4. Install all BMPs as identified in the plan.
5. Maintain all drainage systems, BMPs and other facilities identified in the plan.
6. Repair any siltation or erosion damage to adjoining surfaces resulting from LDC activities and document repairs in a site erosion control log.
7. Inspect BMPs within 24 hours after each 0.5 inch or more of rainfall which results in runoff during active construction periods, and, at least once a week, make needed repairs, and document findings of the inspection in a site erosion control log with date of inspection, name of inspector and description of present phase of construction.
8. Allow City Engineer permission to enter the site for inspections.

Stormwater Management Permit Requirements, 35.08(4)

1. Comply with other applicable federal, state, and local laws and regulations.
2. Design and install all structural and non-structural stormwater management measures in accordance with the approved stormwater management plan and this permit.
3. Notify the City Engineer at least 5 business days before commencing any work in conjunction with the stormwater management plan and within 5 business days upon completion of the stormwater management practices. Additional notifications may be required.
4. Management practices must be certified "as-built" by a licensed professional engineer. Management practices must pass a final inspection by the City Engineer or designee. Notification of any required changes will be in writing to the responsible party.
5. Notify City Engineer of any significant modifications intended for the management plan. Modifications may need to be submitted to City Engineer for approval.
6. All stormwater management practices shall be maintained in accordance with the management plan.
7. The City Engineer is authorized to perform any work or operations necessary to bring the management measures into conformance with the management plan. Special assessments or charge against the property is authorized.
8. If directed by the City Engineer, repairs shall be made at the responsible party's expense, to all damage to adjoining municipal facilities and drainage ways caused by runoff from activities not in conformance with the approved management plan.
9. Access is granted to the City Engineer or designee for the purpose of inspection.
10. Where construction activity involves changes in direction, increases in peak rate and/or total volume of runoff from a site, the City Engineer may require legal arrangements be made with affected property owners concerning the prevention of endangerment to property or public safety.
11. The responsible party is subject to enforcement actions and penalties under 35.13.
